Material Safety Data Sheet

Section 1- Chemical Product and Company Identification

1. Chemical Product Identification

Product name: Li-ion Polymer Battery

Model: PL622749

2. Company Identification

Manufacturer /Supplier Name: Positive & Negative Power Technology Co., Ltd.

Address: 7th Floor, Building A, Guohong Building, Huaqing Road And Meron Road Interchange

Longhua Town, Baoan District Shenzhen

Telephone number of the supplier:+86-0755-33563135 Emergency Telephone No.(24h): +86-0755-33563135

Fax: +86-0755-23112696

e-mail address:kekefly@126.com

This MSDS was prepared by SEM.Test Compliance Service Co., Ltd.

Item Number: STR13058241S

Referenced documents: ISO 11014:2009 Safety data sheet for chemical products;

Section 2 - Hazards Identification

Preparation hazards and classification Apperance, Color, and Odor Primary Route(s) of Exposure These chemicals are contained in a sealed stainless steel enclosure. Risk of exposure occurs only if the cell is mechanically, thermally or electrically abused to the point of compromising the enclosure. If this occurs, exposure to the electrolyte solution contained within can occur by Inhalation, Ingestion, Eye contact and Skin contact ACUTE (short term): see Section 8 for exposure controls In the event that this health.
Color, and Odor Primary Route(s) of Exposure These chemicals are contained in a sealed stainless steel enclosure. Risk of exposure occurs only if the cell is mechanically, thermally or electrically abused to the point of compromising the enclosure. If this occurs, exposure to the electrolyte solution contained within can occur by Inhalation, Ingestion, Eye contact and Skin contact Potential ACUTE (short term): see Section 8 for exposure controls In the event that this

Hoalth
Health heatens had been wintered the electrolists contained within the heatens
Effects: battery has been ruptured, the electrolyte solution contained within the battery
would be corrosive and can cause burns.
Inhalation: Inhalation of materials from a sealed battery is not an expected route of
exposure. Vapors or mists from a ruptured battery may cause respiratory irritation.
Ingestion: Swallowing of materials from a sealed battery is not an expected route
of exposure. Swallowing the contents of an open battery can cause serious
chemical burns of mouth, esophagus, and gastrointestinal tract.
Skin: Contact between the battery and skin will not cause any harm. Skin contact
with contents of an open battery can cause severe irritation or burns to the skin.
Eye: Contact between the battery and the eye will not cause any harm. Eye contact
with contents of an open battery can cause severe irritation or burns to the eye.

Section 3 – Composition/Information on Ingredients

Li-ion Polymer Battery is a mixture.

Hazardous Ingredients (Chemical Name)	Concentration or concentration ranges (%)	CAS Number
Aluminum (Al)	5.25	7429-90-5
Copper (Cu)	11.03	7440-50-8
Separator	2.93	N/A
Lithium Cobalt Oxide (LiCoO2)	39.62	12190-79-3
		21324-40-3
Electrolyte (proprietory)	16.93	96-49-1
Electrolyte(proprietary)	16.93	616-38-6
		623-53-0
Aluminum packing foil	2,71	N/A
Nickel	2.17	7440-02-0
Carbon	19.36	1333-86-4

Note: CAS number is Chemical Abstract Service Registry Number. N/A=Not apply.

Section 4 - First-aid Measures

Inhalation	If contents of an opened battery are inhaled, remove source of contamination or
	move victim to fresh air. Obtain medical advice.
Skin contact	If skin contact with contents of an open battery occurs, as quickly as possible
	remove contaminated clothing, shoes and leather goods. Immediately flush with
	lukewarm, gently flowing water for at least 30 minutes. If irritation or pain persists,
	seek medical attention. Completely decontaminate clothing, shoes and leather
	goods before reuse or discard.
Eye contact	If eye contact with contents of an open battery occurs, immediately flush the
	contaminated eye(s) with lukewarm, gently flowing water for at least 30 minutes
	while holding the eyelids open. Neutral saline solution may be used as soon as it is

3/F,Jinbao Commerce Building, Xin'an Fanshen Road, Bao'an District, Shenzhen, P.R.C

Material Safety Data Sheet

	available. If necessary, continue flushing during transport to emergency care
	facility. Take care not to rinse contaminated water into the unaffected eye or onto
	face. Quickly transport victim to an emergency care facility.
Ingestion	If ingestion of contents of an open battery occurs, never give anything by mouth if
	victim is rapidly losing consciousness, or is unconscious or convulsing. Have victim
	rinse mouth thoroughly with water. DO NOT INDUCE VOMITING. Have victim
	drink 60 to 240 mL (2-8 oz.) of water. If vomiting occurs naturally, have victim lean
	forward to reduce risk of aspiration. Have victim rinse mouth with water again.
	Quickly transport victim to an emergency care facility.

Section 5 - Fire-fighting Measures

Flammable	In the event that this battery has been ruptured, the electrolyte solution contain
Properties	within the battery would be flammable. Like any sealed container, battery cells may
	rupture when exposed to excessive heat; this could result in the release of
	flammable or corrosive materials.
Suitable	Y
extinguishing	Use extinguishing media suitable for the materials that are burning.

Section 6 - Accidental Release Measures

Personal Precautions, protective equipment, and	Restrict access to area until completion of
emergency procedures	clean-up. Do not touch the spilled material. Wear
	adequate personal protective equipment as
	indicated in Section 8.

Report No.:STR13058241S Page 4 of 10

3/F,Jinbao Commerce Building, Xin'an Fanshen Road, Bao'an District, Shenzhen, P.R.C

Material Safety Data Sheet

Environmental Precautions	Prevent material from contaminating soil and
	from entering sewers or waterways.
Methods and materials for Containment	Stop the leak if safe to do so. Contain the spilled
	liquid with dry sand or earth. Clean up spills
	immediately.
Methods and materials for cleaning up	Absorb spilled material with an inert absorbent
	(dry sand or earth). Scoop contaminated
	absorbent into an acceptable waste container.
	Collect all contaminated absorbent and dispose
	of according to directions in Section 13. Scrub
	the area with detergent and water; collect all
	contaminated wash water for proper disposal.

Section 7 – Handling and Storage

Handling	Do not dismantle, open or shred secondary Li-ion Polymer Battery;
	Don't handling Li-ion Polymer Battery with metalwork. Do not open, dissemble, crush or burn battery. Ensure good ventilation/ exhaustion at the workplace.
	Prevent formation of dust.
X ,	Information about protection against explosions and fires: Keep ignition sources away- Do not smoke.
Storage	If the Li-ion Polymer Battery is subject to storage for such a long term as more than 3 months, it is recommended to recharge the Li-ion Polymer Battery periodically.
' V	3 months: -10℃~+40℃, 45 to 85%RH
	And recommended at 0 ℃~+35 ℃ for long period storage.
The same	The capacity recovery rate in the delivery state (50% capacity of fully charged) after storage is assumed to be 80% or more.
	The voltage for a long time storage shall be 3.7V~4.2V range.
	Do not storage Li-ion Polymer Battery haphazardly in a box or drawer where they may short-circuit each other or be short-circuited by other metal objects.
	Keep out of reach of children.
	Do not expose Li-ion Polymer Battery to heat or fire. Avoid storage in direct sunlight.
	Do not store together with oxidizing and acidic materials.

3/F,Jinbao Commerce Building, Xin'an Fanshen Road, Bao'an District, Shenzhen, P.R.C

Material Safety Data Sheet

Section 8 – Exposure Controls and Personal Protection

Engineering Controls	Use local exhaust ventilation or other
	engineering controls to control sources of dust,
	mist, fumes and vapor.
	Keep away from heat and open flame. Store in a
	cool, dry place.
Personal Protective Equipment	Respiratory Protection: Not necessary under
	normal conditions.
	Skin and body Protection: Not necessary
	under normal conditions, Wear neoprene or
	nitrile rubber gloves if handling an open or
	leaking battery.
	Hand protection: Wear neoprene or natural
	rubber material gloves if handling an open or
	leaking battery.
	Eye Protection: Not necessary under normal
	conditions, Wear safety glasses if handling an
	open or leaking battery.
Other Protective Equipment	Have a safety shower and eye wash fountain
	readily available in the immediate work area.
Hygiene Measures	Do not eat, drink, or smoke in work area.
X .	Maintain good housekeeping.

Section 9 - Physical and Chemical Properties

	Form: Solid	
Physical State	Color: Blue	
	Odour: Monotony	
Change in c	condition:	
pH, with ind	lication of the concentration	Not applicable
Melting point/freezing point		Not available.
Boiling Point, initial boiling point and Boiling range:		Not available.
Flash Point		Not available.
Upper/lower flammability or explosive limits		Not available.
Vapor Pressure:		Not applicable
Vapor Density: (Air = 1)		Not applicable

3/F,Jinbao Commerce Building, Xin'an Fanshen Road, Bao'an District, Shenzhen, P.R.C

Material Safety Data Sheet

Density/relative density	Not available.
Solubility in Water:	Insoluble
n-octanol/water partition coefficient	Not available.
Auto-ignition temperature	130°C
Decomposition temperature	Not available.
Odout threshold	Not available.
Evaporation rate	Not available.
Flammability (soil, gas)	Not available.
Viscosity	Not applicable

Section 10 - Stability and Reactivity

Stability	The product is stable under normal conditions.
Conditions to Avoid (e.g. static discharge, shock or vibration)	Do not subject Li-ion Polymer Battery to mechanical shock. Vibration encoutered during transportation does not cause leakage, fire or explosion. Do not disassemble, crush, short or install with incorrect polarity. Avoid mechanical or electrical abuse.
Incompatible Materials	Not Available
Hazardous Decomposition Products	This material may release toxic fumes if burned or exposed to fire
Possibility of Hazardous Reaction	Not Available

Section 11 - Toxicological Information

Irritation	Risk of irritation occurs only if the cell is
SE INVENTOR	mechanically, thermally or electrically abused to
	the point of compromising the enclosure. If this
	occurs, irritation to the skin, eyes and respiratory
	tract may occur.
Sensitization	Not Available
Neurological Effects	Not Available
Teratoaenicitv	Not Available
Reproductive Toxicity	Not Available
Mutagenicity (Genetic Effects)	Not Available
Toxicologically Synergistic Materials	Not Available

3/F,Jinbao Commerce Building, Xin'an Fanshen Road, Bao'an District, Shenzhen, P.R.C

Material Safety Data Sheet

Section 12 - Ecological Information

General note:	Water hazard class 1(Self-assessment): slightly
	hazardous for water.
	Do not allow undiluted product or large quantities
	of it to reach ground water, water course or
	sewage system.
Anticipated behavior of a chemical product in	Not Available
environment/possible environmental	
impace/ecotoxicity	
Mobility in soil	Not Available
Persistence and Degradability	Not Available
Bioaccumulation potential	Not Available
Other Adverse Effects	Not Available

Section 13 - Disposal Considerations

Product disposal recommendation: Observe local, state and federal laws and regulations. Packaging disposal recommendation: Be aware discarded batteries may cause fire, tape the battery terminals to insulate them. Don't disassembly the battery. Completely discharge containers (no tear drops, no powder rest, scraped carefully). Containers may be recycled or re-used. Observe local, state and federal laws and regulations.

The potential effects on the environment and human health of the substances used in batteries and accumulators; the desirability of not disposing of waste batteries and accumulators as unsorted municipal waste and of participating in their separate collection so as to facilitate treatment and recycling;

Section 14 - Transport Information

This report applies to by sea, by air and by land;

The Li-ion Polymer Battery (model: PL622749) tested according to the requirements of the UN manual of tests and Criteria, Part III, subsection 38.3;

Li-ion Polymer Battery was protected so as to prevent short circuits. This includes protection against contact with conductive materials within the same packaging that could lead to short circuit;

The Li-ion Polymer Battery according to Section II/Section IB of PACKING INSTRUCTION 965, or Section II of PACKING INSTRUCTION 966~967 of the 2013 IATA Dangerous Goods regulations 54th Edition may be transported. and applicable U.S. DOT regulations for the safe transport of Li-ion Polymer Battery.

3/F,Jinbao Commerce Building, Xin'an Fanshen Road, Bao'an District, Shenzhen, P.R.C

Material Safety Data Sheet

More information concerning shipping, testing, marking and packaging can be obtained from label master at http://www.labelmaster.com/.

The packaging shall be adequate to avoid mechanical damage during transport, handling and stacking. The materials and pack design shall be chosen so as to prevent the development of unintentional electrical conduction, corrosion of the terminals and ingress of moisture.

The package must be handled with care and that a flammability hazard exists if the package is damaged;

Each package must be labeled with a Li-ion Polymer Battery handling label or in addition to the Class 9 hazard label.

With regard to transport, the following regulations are cited and considered:

- The International Civil Aviation Organization (ICAO) Technical Instructions.
- The International Air transport Association (IATA) Dangerous Goods Regulations. UN number of lithium battery: UN3480 or UN3481;

UN Proper shipping name/Description (technical name): Lithium ion batteries or Lithium ion batteries contained in equipment or Lithium ion batteries packed with equipment;

UN Classification (Transport hazard class): Non dangerous;

Marine pollutant(Y/N): N;

- The International Maritime Dangerous Goods (IMDG) Code.

For lithium-ion batteries by sea, provided that packaging is strong and prevent the products from short-circuit.

UN number of lithium battery: UN3480 or UN3481;

UN Proper shipping name/Description (technical name): Lithium ion batteries or Lithium ion batteries contained in equipment or Lithium ion batteries packed with equipment;

UN Classification (Transport hazard class): Non dangerous;

Marine pollutant(Y/N): Y;

Special Provision: International maritime dangerous goods code (IMDG) 188, 230, 310, 348, 957;

- The US Hazardous Materials Regulation (HMR) pursuant to a final rule issued by RSPA
- The Office of Hazardous Materials Safety within the US Department of Transportations' (DOT) Research and Special Programs Administration (RSPA)

Section 15 - Regulatory Information

OSHA	hazard communication standard (2	9 CFR 1910.1200)
~	Hazardous	v Non-hazardous

Section 16 - Other Information

The information above is believed to be accurate and represents the best information currently available to us. however, concorde makes no warranty of merchantability or any other warranty, express or implied, with respect to such information, and we assume no liability resulting from its use. users should make their own investigations to determine the suitability of the information for their particular purposes. although reasonable precautions have been taken in the preparation of the data
